Location: London/Bristol (Hybrid or Remote)

Are you an experienced Umbraco C# .NET Web Developer looking to join a close-knit, growing, and skilled team?

If you have a proven track record in developing innovative software solutions using the Umbraco with .NET framework and Azure Services, then this could be the perfect opportunity for you.

About ClearCourse

Join a rapidly growing collaborative of disruptive technology companies working together to build a great software and payments business, with exceptional people and the best products and services.

Across our portfolio of software platforms, we're creating an environment where talented entrepreneurs and businesses flourish. Our team is over 900 people strong and supports over 20,000 customers across the globe.

We have 40 brands located across the UK and internationally, with two primary UK ClearCourse hubs, in which multiple brands are located in London and Preston. These market-leading software businesses form our five verticals; with our integrated payments

platform, ClearAccept intrinsic to the entire organisation.

Working better together is central to everything we do, each time we add a new business we're adding new ideas and innovation.

Our mission is to help our customers build great businesses with our industry-specific software and embedded payments solutions.

Job Overview

The .NET Developer role is responsible for the delivery for all assigned user stories from estimation through code, bug fixing and documentation while achieving target delivery for the Sprint and or other measure of throughput as per the project methodology.

The .NET Developer works within a delivery team, typically including a mix of Developers, Solution Architects, QA Engineers, Business Analysts, Functional Consultants and Scrum Masters (client-facing Project Manager). The role is responsible for creation and estimate tasks, writing of quality code to agreed standards defined Principal Solution Architecture team.

This role has a strong delivery component and is responsible for delivery of software in agile Sprints, The .NET Developer should take ownership of their User Stories as well as perform code reviews for others, taking care to think about performance, security and maintainability.
