

182950 Community Adult General Nurse

[Apply Now](#)

Company: NHS Dumfries & Galloway

Location: United Kingdom

Category: healthcare-practitioners-and-technical

A current UK NMC registration and ability to travel independently, out with public transport routes/times, is essential.

This is an exciting opportunity to join an established Community Nursing workforce and be part of the Stewartry Home Team.

A current NMC registration and driving licence is essential. Must be able to travel independently to remote areas of the region that are not on public transport routes.

The post holder will be expected to deliver high quality, effective, person centred care to the house bound within the community working in partnership with service users, other core members of the Home Team and aligned services including care providers.

The caseload population is derived from all GP practices within the Stewartry.

Under Equality Legislation we can only state that a driving licence is required if a post is a 'driving job - eg Driver.

Following discussions, we can now routinely use the following text in adverts where a post holder would be expected to drive.

This post may involve clinic and home visits in remote and rural areas therefore a current driving licence is an essential requirement of this post. However, if you have a disability which precludes you from holding a driving licence, consideration will be given if alternative transport can be arranged.

Recruitment have also set up an assessment question option (wording below) which managers can request be added to the Jobtrain application form for candidates to answer when completing their application. This would ensure that the advert wording hadn't been missed by

a candidate and provide shortlisters with the information they need to consider an application. The assessment form requires candidates to answer this specific question before continuing their application:

Assessment form title - **NHS D&G - Query regarding driving in rural and remote areas**

This post may involve clinic and home visits in remote and rural areas. A current driving licence is an essential requirement of this post. However, if you have a disability which precludes you from holding a driving licence consideration will be given if alternative transport can be arranged.

Please detail how you would facilitate travel to clinic and home visits.
