

3D CAD Technician - Autodesk Inventor Professional (iLogic and Vault)

[Apply Now](#)

Company: F-CAD

Location: Glasgow

Category: other-general

Job Title: 3D CAD Technician - Autodesk Inventor Professional (iLogic and Vault)

Salary: Negotiable/dependent on experience

Job Type: Sub-Contract basis

Company details:

F-CAD Ltd is a Glasgow-based Computer-Aided Design Services Company with big aspirations for growth and in the process of expanding our small but dynamic team. Our company culture is built on innovation, collaboration, and a passion for excellence. We are currently seeking an experienced 3D CAD technician who is proficient in Autodesk Inventor Professional with iLogic and Vault, to join our team on a sub-contract basis initially with the future prospect of full-time employment.

Role Overview:

As an experienced 3D CAD technician, you will play a crucial role in our project delivery process. Collaborating closely with our team and clients, you will utilise your expertise using Autodesk Inventor Professional to produce accurate and detailed 3D models, dimensioned manufacturing drawings and be experienced in the automating process and

the creation of Parametric Assembly Models.

Key Responsibilities:

Utilise Autodesk Inventor Professional to create detailed 3D models and dimensioned manufacturing drawings based on client information/data files/engineering and GA drawings.

Ability to create Parametric Assembly Models and be proficient in the use of iLogic.

Generate assembly drawings, Bills of Material and Fitting /Assembly Instructions.

Address requests for information (RFIs) and technical queries (TQs) as needed.

Collaborate closely with clients, including potential site visits, to ensure project requirements are met.

Qualifications and skills:

Essential: Proficiency in Autodesk Inventor Professional software with iLogic & experience using Autodesk Vault.

An engineering qualification is preferred, but not essential. However, a good understanding of general engineering principles and material selection is a necessity.

Ability to create parametric assembly models and have experience with the automating processes.

Experience with geometric dimensioning and tolerancing (GD&T)

Experience with Surface Based Modelling and working with Point Cloud and Laser Scanned Models.

Experience with aerofoils is preferred.

Experience reading architectural drawings is preferred.

Experience with timber and GRP products is preferred.

Ability to work under pressure to meet tight deadlines.

Excellent communication skills.

Exceptional attention to detail and pride in workmanship.

Organised with the ability to prioritise tasks.
