

Agile Delivery Manager

[Apply Now](#)

Company: Expert Employment

Location: Belfast

Category: other-general

Technology and consulting service company is looking to expand their team with an Agile Delivery Manager. Managing the full project life cycle, setting standards for assignments and applications. **The main responsibilities of an Agile Delivery Manager include:**

Work to educate clients on the emerging practices in relation to their specific industry and key business requirements

Manage multiple client engagements simultaneously

Work in partnership with the Management team, create the strategic plan and implement new processes and approaches to achieve it

Actively lead a successful team in line with the strategic plan

Guide and support the professional development of specialist team members

Leadership responsibility for provision of consulting services to corporate clients and achieving agreed objectives

For you to be the ideal Agile Delivery Manager candidate, you will:

Degree in Computer Science, Information Systems, or other related field, or equivalent work experience

Has achieved a formal certification as a Scrum Master, Kanban Lead, Lean Six Sigma certification or similar Agile approach

Knowledge of MS SharePoint

Proven evidence of Coaching skill development through experience

Actively involved in the Agile community through publications, speaking events or facilitating community events

Proven experience in leading multiple teams in agile software delivery approaches

Extensive experience with all stages of the product development lifecycle

If you think that you are suitable for this Agile Delivery Manager role, please apply now!
