Company: Rhythm Careers

Location: London Area

Category: other-general

As specialists in the mission critical data centres sector, our client are benefiting from the seemingly endless boom in this growing sector. Known for the design and delivery of complex data centre sites across the UK and Europe, this role is specifically seeking a technically strong Architect or Architectural Technologist with strong stage 5 and Revit abilities. Working closely with the project leading Associate Director, you'll be taking a key role on coordination of sub-contractor information in the Revit model, and the design and coordination of complex tender packages for fitout and complex M&E led projects. A position offering a high degree of independence, you'll benefit from regular opportunities to visit project sites across Europe, whilst enhancing your core technical abilities. This is a great role for someone with a passion for problem solving and complex, technically designed, architecture. Apply now.
