

## Asset Integrity Engineer / Mechanical Integrity Engineer

[Apply Now](#)

Company: Kintec Global Recruitment

Location: Ludgate Hill

Category: computer-and-mathematical

This company is heavily investing this year in the plant and looking for 3 Lead Technical experts in the Oil & Gas / Chemical / Petrochemical Industry based in Cheshire.

The role will be on a Permanent basis / they offer long terms career prospects in the UK / Globally / Relocation / Benefits £65k - £90k plus final salary pension / Share scheme ( Buy 1 get 2 free )

Our Mechanical Integrity Engineers are responsible for the provision of mechanical, corrosion, inspection and materials engineering support to the refinery and petrochemical plant.

The key responsibilities include:

Providing engineering input to manage the mechanical integrity of our fixed equipment assets  
-Ensuring compliance to legislation, such as pressure systems safety regulations, through our written schemes of examination

Act as a Technical Advisor to our business teams, providing assistance with risk based decision making, management of change and owners engineering -Assessing equipment condition in the field and defining repair scopes to fixed equipment

Developing worklists for events/turnarounds and supporting work scope creation to ensure safe, reliable operation

Mentoring other engineers, with the aim of developing both our knowledge and people  
Client will provide sponsorship as long as the candidate meets the requirements
