

## Asset Lifecycle Engineer

[Apply Now](#)

Company: Headcount Solutions Limited

Location: Dublin

Category: other-general

Headcount Solutions is seeking an Asset Lifecycle Engineer for a client's biotech site in Dublin.

Reporting to the site's Asset Lifecycle SME, this role will act as a main point of contact for all project related Asset Lifecycle Management activities, including execution of asset criticality assessments, managing the collation and verification of asset data, Impact assessment of project change controls and ensuring equipment handover meets our client's expected specifications and standards.

### Key Responsibilities:

- Responsible for facilitation of Asset criticality assessments.
- Impact assessment of project change controls from and Asset Management perspective.
- Completion of asset data build and transfer to CMMS team for upload.
- Ensuring handover requirements are met from an Asset Management & Reliability perspective.
- Ensuring local and global engineering and Asset Management standards are adhered to during asset set up and handover.

- Monitor adherence to site and global procedures from an Asset Management and Engineering perspective.

#### Qualifications & Experience:

- Engineering qualification with minimum 8-10 years' experience, preferably in Projects/Asset management.

- Project Engineering/ Commissioning experience required, ideally on large capital projects.

- Strong understanding of all aspects of project delivery, equip. handover and asset management.

- The ability to communicate to and manage diverse stakeholder groups.

- Strong attention to detail and ability to work in a fast-moving project environment.

For further information, please contact Mick on (phone number removed) or forward details in confidence to
