

AutoCAD Designer

[Apply Now](#)

Company: RUHI CONSULTANT

Location: Par

Category: other-general

Overview:

The AutoCAD Designer plays a crucial role in our organization by producing accurate technical drawings and 3D models to support the design and development of various projects.

Key Responsibilities:

- Create precise technical drawings and 3D models using AutoCAD software
- Collaborate with engineers and architects to understand project requirements
- Produce detailed architectural and structural drawings for construction projects
- Review and revise drawings based on feedback and project requirements
- Ensure compliance with industry standards and specifications
- Participate in project meetings to present and discuss design concepts
- Manage and organize drawing files and documentation
- Contribute to the continuous improvement of design processes and standards
- Stay updated with the latest AutoCAD tools and techniques
- Coordinate with other design team members to ensure design consistency

Required Qualifications:

Bachelors degree in Engineering Architecture or related field

Proven experience as an AutoCAD Designer or similar role

Demonstrated proficiency in AutoCAD software and 3D modeling tools

Strong understanding of technical drawing principles and practices

Ability to interpret and execute complex design requirements

Excellent attention to detail and accuracy in drawing production

Knowledge of building codes and regulations

Good communication and collaboration skills
