

Automation Engineer

[Apply Now](#)

Company: protolabs

Location: Telford

Category: architecture-and-engineering

For our location in Telford we are looking for you as a Manufacturing Engineer in full-time as soon as possible.

About us:

Protolabs is the world's fastest digital manufacturing source for rapid prototyping and on-demand production. With our automated quotation system, we make custom parts in as fast as 1 day using 3D printing, CNC machining and injection moulding processes.

This is what you can expect:

Growth-oriented company with a focus on your development journey through regular feedback and discussions.

Open and welcoming corporate culture globally.

Our Values: trust, teamwork, and achievement.

Extensive e-learning platform with 300+ training courses and on-site sessions, including internal leadership training

Onsite car parking, bicycle storage, and convenient public transport links.

Newly built canteen with free hot drinks.

Employee Discount scheme with savings across thousands of UK retailers.

Employee wellbeing culture with mental health support, wellbeing portal, and psychologist assistance.

Monetary-based Reward Schemes for recognition, referrals, anniversaries, and life events.

37.5 hours per week, permanent contract with regular breaks, flexi-time working hours structure

25 days holiday entitlement plus Bank Holidays, increasing with length of service.

Death In Service Policy: 4 x base salary for eligible employees

Your Responsibilities:

Identify opportunities to increase efficiency with automation

Prepare process designs for new product/process introduction including design and procurement of jigs, tooling and where necessary capital equipment.

Lead projects for new product/process introduction into manufacturing to ensure all project requirements are achieved.

Examining and tendering for new equipment to ensure the highest quality at the best price.

Liaising with the research and development department to ensure the company is at the forefront of ground-breaking research.

Monitor and analyse current manufacturing methods to create improvements including; yield improvements (scrap reduction) & process designs to prevent quality concerns

Engage in creative problem solving to address operational issues.

Participate in factory layout changes to facilitate capacity increase or operational improvement.

The go-to person for technical problems/ fault finding, giving advice and guidance.

Continually seek to improve work processes and individual performance.

Support training department and department managers to create and maintain work instructions and other training material as needed to support training efforts.

Work off shift to ensure continuity amongst the team when implementing new processes and procedures.

Adhere to all quality and safety standards and take immediate action to correct safety issues.

Your qualifications & experience:

Experience with robotics & automation is essential

Experience with AI and machine learning

Excellent planning and organising capabilities

Knowledge of CNC machining / plastic injection moulding / rapid prototyping or similar process an advantage

Independent, dependable, resourceful and self-motivated.

Experience with measurement instruments (micrometers, calipers, height gages).

Experience with Machinery used in a metalworking shop (Vertical Mills, Lathes, Drills, Grinders, etc.)

Does this sound exciting to you?

Then please send us your detailed application through our online application system.

Your contact person: Brett Osborne, Talent Acquisition Advisor

We look forward to hearing from you!
