

## Automation Engineering Site Supervisor (days)

[Apply Now](#)

Company: Westerdale Group

Location: Dordon

Category: architecture-and-engineering

We now have an exciting new opportunity for an experienced Engineering Maintenance Supervisor to join our fast growing and highly successful team that specialises in postal/sortation systems.

The Engineering Maintenance Supervisor is the vocal point of the engineering team for the customer on all automation related topics. They provide a broad based electrical, mechanical, FM and software technical ability along with a right first-time mentality and a proactive approach to identifying ways to improve the site's performance. You must have PLC Siemens TIA portal software experience.

The Ideal candidate will be tasked to get motivate a team of engineers and make sure all PPM and reactive maintenance are complete on a wide range automated materials handling equipment such as conveyors, sortation and packaging machinery.

This is an opportunity to work for a multi billion pound company in the postal/sortation sector. My client is a firm believer in progression within, will give you all the support and training to progress your career to the next stage.

### Desired Skills & Experience

Minimum NVQ Level 3 / City and Guilds in an engineering discipline

Previous experience of working in an operational engineering role within a similar environment

Day 37.5 hours per week Monday - Friday

must have PLC Siemens TIA portal software experience

Experience of managing small teams on a customer site

Familiar with basic hand tools such as spanners, screwdrivers, Allen keys

Excellent communication skills and customer focus

Ability to work in a time critical environment Our Automation division is a market leader in this specialist industry with outstanding relationships across the UK. Application Process

If you have the above skills and wish to be considered for this position or find out more details then please contact Matthew Crate-Fox.
