Company: Smart Sourcer

Location: Solihull

Category: other-general

Outstanding opportunity to this fast paced, rapidly growing, PropTech scale up on a permanent basis as an AWS DevSecOps (AWS Security Engineer). This software business provides the world's leading technology platform for property management and estate agency globally and offers the opportunity to shape the direction of a newly formed DevSecOps function regarding security policies, tooling and best practice. We're looking for an experienced engineer, competent in responding and resolving cloud security incidents with deep AWS security expertise and an understanding of engineering cloud platforms on an infrastructure as code basis (IaC). You'll require the following skills and experience: 3+ years' experience as a DevSecOps Engineer or Security Engineer with AWS. In depth knowledge of AWS security tools inc. SecurityHub, Inspector, Detective, CloudTrail, GuardDuty and CloudWatch. Proficiency in AWS services and features, including IAM, VPC, EC2, S3, RDS, Lambda, and CloudFormation. Strong understanding of security best practices, principles, and frameworks, such as ISO 27001 controls and NIST Guidelines. Experience in implementing security automation using scripting languages e.g. Python and infrastructure-as-code (IaC) tools. Ability to perform security threat modelling and risk assessments to identify and prioritize security risks. Experience with security incident response and handling, including log analysis and forensics. Outstanding business stakeholder engagement and management experience, inc. presenting of solutions to the exec team. Certifications such as AWS Certified Security Specialist are a plus. £70k-£75k + bonus + benefits. 90% remote, occasional travel the Midlands.
