

Battery Systems - Battery Disconnect Devices

[Apply Now](#)

Company: Evera Recruitment Ltd

Location: Coventry

Category: architecture-and-engineering

An iconic luxury British sports car manufacturer has an exciting opportunity for a Battery Systems – Battery Disconnect Devices. The successful candidate will be responsible for the on-time specification and delivery of the contactors, fuses and other devices required to electrically isolate the HV Battery systems, across the different electrified platforms.

The Battery Systems – Battery Disconnect Devices will:

Be responsible for the Electrothermal modelling and behaviour of the specified components, and the integration in the HV Battery System.

Release process of the given components, as well as similar components that could be provided by the same supplier.

Deliver within an APQP, six sigma or similar framework (DFMEA, quality planning, PPAP.) Identify & contain potential quality concerns using engineering quality systems.

Weekly program status report as part of the Battery working group.

Be responsible for the delivery of Contactors, relays, pyro fuses and current sensing devices for all the in-house battery developments as well as reviewing and assessing the developments provided by our engineering partners.

The Battery Systems – Battery Disconnect Devices will have:

Experience with CAD (NX, CATIA), Mentor or similar toolset.

Engineering Degree in Electrical, Electronic and/or related field.

Experience within the automotive industry or similar domain experience.

DFMEA delivery experience.

Excellent written and verbal communication skills.

Ability to organise multiple inputs into succinct summary.

For more details, or to apply, simply click the "Apply now" button, submit a copy of your recently updated CV and we will be in touch!
