

## Blockchain Developer

[Apply Now](#)

Company: CAGA

Location: United Kingdom

Category: other-general

Join our dynamic team and be part of a pioneering decentralized autonomous organization (DAO) that has garnered recognition in the blockchain industry. Audited by Certik, our project has swiftly gained traction since its successful launch on Uniswap. Within a mere month, we've secured listings on multiple exchanges, a testament to our dedication to innovation and expansion. To further propel our growth, we are on the lookout for an experienced Blockchain Developer proficient in Cosmos, Solidity, C++, Golang, and DevOps. Embrace the opportunity to contribute to cutting-edge advancements in blockchain technology with us.

**Responsibilities**

**Blockchain Development:**

- Lead the development and maintenance of our blockchain infrastructure based on Solidity and Cosmos, utilizing languages such as C++ and Golang.
- Implement and optimize smart contracts, protocols, and consensus algorithms to enhance the performance and security of the blockchain.

**DevOps:**

- Manage and optimize the deployment process, ensuring seamless integration and continuous delivery of blockchain updates.
- Implement and maintain DevOps best practices to enhance the efficiency of the development workflow.

**Integration and Partnerships:**

- Collaborate with vendors and external partners to integrate solutions seamlessly into our blockchain ecosystem.
- Work closely with the business development team to identify and implement strategic partnerships, contributing to the overall growth of the company.

**Cross-Departmental Collaboration:**

- Engage with other departments to understand their requirements and contribute to the development of solutions that align with the company's goals.
- Actively participate in cross-functional teams to drive innovation and efficiency in the organization.

**Web3 DeFi Experience:**

- Leverage your expertise in Web3 and

decentralized finance (DeFi) to contribute to the development and enhancement of decentralized applications within our ecosystem.● Stay updated on the latest trends and advancements in the blockchain and DeFi space. Qualifications● Bachelor's degree in Computer Science, Engineering, or a related field.● Experience with op-stack, layer 2 and hands-on experience with at least one chain on mainnet.● Proven experience in blockchain development with a focus on Solidity, Cosmos, C++, Golang.● Strong understanding of blockchain protocols, smart contracts, and consensus algorithms.● Experience in DevOps practices for blockchain deployment and management.● Previous involvement in Web3 and decentralized finance (DeFi) projects.● Excellent problem-solving skills and a proactive mindset. Benefits:● Competitive salary package● Opportunity to work on cutting-edge blockchain technologies and contribute to a rapidly growing DAO.● Collaborative and innovative work environment.● Professional development opportunities and career growth. Interested candidates please send your cv to [jobs@cagacrypto.com](mailto:jobs@cagacrypto.com).
