

Business Process and Systems Lead - Insurance

[Apply Now](#)

Company: Jenrick Commercial

Location: City of London

Category: other-general

Business Process and Systems Lead * Insurance / Financial Services * City of London *
Permanent * c. £52,000 - £62,000 p.a. plus bonus and benefits *

Business Process and Systems Lead is required for a highly successful global company who specialise within the insurance and reinsurance industry. This is a fantastic opportunity to work for a growing, ambitious company who work hard to retain a positive family feel within the business.

Working for a company that have a very agile workforce with footprints in London, US and Asia.

This is a permanent position, working on a hybrid basis, 3 in the office and 2 days from home. In reward you will be paid a salary of up to £62,000 p.a. plus bonus and benefits.

As Business Process and Systems Lead you will have some direct staff monitoring and development, you will have to work constructively and seamlessly with managers to ensure collective department goals are met.

The successful Business Process and Systems Lead must have:

Experience within insurance / financial services.

Advance MS Excel user.

Outstanding analytical skills with the ability to summarise data.

Proven IT knowledge and project management skills.

Ideally have some knowledge of Salesforce.

Business Process and Systems Lead duties include:

Work with the systems department to develop and execute UAT plans.

Work alongside the Training Lead to develop and execute all training material.

Support the development and implementation of a new system front end.

Ensure all processes and controls are robust, documented and adhered too.

Ensure dataflows are interrupted to the data warehouse quality.

Develop and maintain operational monitoring dashboards.

Support the development and introduction of 'dashboard' to help monitor individual performance and identify training needs.

Support process automation and optimisation opportunities as business process and technology evolve.

Assume the role of Technical IT project management lead on all initiative where technology changes impact the department.

If you have the above skills and experience and want to learn more about this position, then please apply via the job board for consideration
