Company: Pertemps Bond

Location: Sheffield

Category: architecture-and-engineering

## Civil Design Engineer

**Location: Sheffield**

**Salary: £45,000**

**Benefits including: Car allowance or a company car, 25 days holiday (Increasing with service)**

**Plus many more.**

**! Immediate start available !**

Founded in 2013 and now one of the leading providers of utility solutions within fresh/wastewater services, this company specialises in end-to-end services including design, construction, maintenance, civil engineering and project management.

If you are passionate about innovative solutions, have experience in civil engineering and want to be a part of an award-winning company - "Most Innovative Utility Company 2021" and "Best Large Business 2020" then this role is for you.

### **The Opportunity**

Having won a new on-going contract (minimum 5 years with huge potential for further extensions) we are now in the next phase of growth and development. This chance to design, develop implement and champion new ideas would essentially see you paving the way for

future projects.

With responsibility to undertake detailed design work on wastewater and clean water infrastructure, along with agreeing on design philosophy and fundamentals, this position would see you striving for excellence within your field.

## **The Role**

Through involvement of essential waste/freshwater projects, this position focuses on supporting project managers to ensure timely delivery within set budgets, including a host of other responsibilities including:

- Overseeing internal and external stakeholder management through vital business meetings and regular communication

- Using awareness of work requirements to proactively monitor timescales, performance and budgets throughout the projects

- Successful allocation and efficient management of CAD production

- Conducting site visits to compile essential information

- Undertaking thorough documentation and drawing reviews

## **Our Ideal Candidate**

With multiple responsibilities at hand, it goes without saying you will be detail orientated with excellent organisation and time-management skills. With knowledge of waste/freshwater infrastructure design, including attenuation design and flow balancing, this role suits an experienced Civil Design Engineer with at least 5-7 years of experience under your belt.

Further to the above:

- Confidence in negotiations and persuasion with the ability to manage challenging situations

- Strong team and independent working skills

- High image projection standards to both internal and external stakeholders

Technically proficient with strong numerical, analytical and IT skills

Proactive mindset elevated for problem-solving, contingency planning skills and collaborative working

Experience in use of AutoCAD and processes

This is an incredibly rewarding opportunity fit for anyone wanting to progress their civil design career, so click to apply. Or, for further information pick up the phone, call Pertemps (Leeds) and ask for Katie Miller.
