Civil and Structural Engineer/Civil and Structural Engineering Lead - Owner's Engineer - Interconnector Converter Site - London - Full Time - Permanent

We're looking for a Civil and Structural Engineer, and a Civil and Structural Engineering Lead in London! There are two roles available, which would suit consulting engineers with a strong background in Civil and Structural design & review for complex projects. Priority will be given to those with Interconnector Converter Site Development design/review experience, but those with a strong technical background in other sectors will also be considered.

The Company: A prestigious international project, cost, and asset management consultancy in Central London with an illustrious reputation within the industry. They are highly regarded both for the technical excellence of their teams, but also as an outstanding place to work.

The Project & Your New Role: The project concerns the Civil and Structural development of a Converter Site in the Isle of Grain. The Converter Site will house the hardware that will facilitate the conversion between HVDC and HVAC, following its import and export through a 1.4GW bi-directional 525kV Interconnector between the United Kingdom and Germany. The role as Civil and Structural Engineer or Engineering Lead, offering Owner's Engineer services, will involve interfacing with the Engineering, Procurement and Construction (EPC) Contractor, reviewing and checking designs of the Civil and Structural elements related to the Converter Site to ensure they are designed and constructed to UK standards.

Responsibilities: Undertaking 'Owner's Engineer' services, you will review designs procured by the EPC contractor and ensure that the proposed and ongoing works are correct, compliant with UK standards, and commercially sound. Assist in managing the

technical review of associated documentation. Function as an independent advocate and risk-mitigator for the project's owner. Attending the office of the EPC contractor in Holborn when necessary, and undertaking regular site visits. Requirements: Chartership with a suitable professional institution OR equivalent proven experience, or evidence of working towards this. A deep understanding of Civil and Structural Engineering design gained through consultancy experience. The required authority, expertise, and communication skills to speak plainly with the EPC Contractor about required amendments to the project. Desirable: German speaking. Experience on Interconnector projects. Benefits Include: Pension Scheme. Life Insurance. Full private Medical Insurance and a Medical Cash Plan (including optical and dental cover). Childcare voucher and cycle to work schemes. Shopping discounts, savings on cinema tickets, hotel bookings and insurances. Up to 27 days holiday plus bank holiday and 2 days charity leave each year. Please apply with your CV if you are interested. Contact George Banks on 07787 736270 for further, informal discussion.
