Company: Schneider Electric

Location: United Kingdom

Category: other-general

Job Title: Trainee Cooling Field Service Engineer Location: Midlands and Basingstoke

Please note that possession of a valid UK driving license is a mandatory requirement for this role, as it involves frequent travel and client visits. Mission/Summary: As an original equipment manufacturer and a global supplier of cooling products, the position will be accountable for working within critical cooling environments for large organisations, across a wide customer base, demonstrating excellent communication and complete ownership of given tasks. These tasks will include commissioning and start-up on new installed equipment, maintenance, service, and repair activities on a variety of different cooling solutions. These solutions will be chilled water, direct expansion, economiser technology, In-row and containment systems, perimeter cooling and small to large (MW) chiller installations. Alongside using additional software programmes and applications for cooling system(s) to be able to complete a variety of tasks on-site as needed. Product training will be given in our cooling academy and access to internal software and applications, you will be expected to utilise technical literature including schematic diagrams, service and maintenance manuals and installation guidelines to complete works to a high standard, following process and working within a team environment covering emergency call out. The main departments you will be working with are: Service coordination, Technical support, Project manager and account teams etc.. You will be required to manage onsite activities and supervise installation contractors to ensure best practice. Skills and Attributes: FGas qualified alongside suitable industry certification to minimum Level 2 City & Guilds refrigeration and air-conditioning. Preferred. Data centre experience preferred Improve own development in Cooling knowledge

Support cooling service representatives in all tasks ranging from, commissioning, reactive repairs, and preventative maintenance Carryout PMV tasks Be part of an on-call rota Use technical documentation and literature effectively Attend reactive calls FGas related works Write reports and service sheets Adhere to method statements and carryout risk assessments Complete both internal and external training course's correctly to the required level Administration such as site reports, expenses, timesheets to be completed in a timely manner Travel the UK Work away from home and book own travel and accommodation (Company credit card provided) Training academy is outside the UK so travel abroad will be required At Schneider Electric, Diversity & Inclusion is at the heart of our organisation, it's an integral part of our history, culture, and identity. We recognise that embracing diversity unlocks innovation and creativity and fosters collaboration. We want our employees to reflect the diversity of our communities and the customers we serve. As a result, our teams are stronger to drive the company's future. We are proudly participating in the Disability Confident Program offering support to people in the workplace who consider themselves living with a disability. What we offer you: Competitive salary & Bonus Scheme, 28 Days Annual Leave + Public Holidays, Holiday Buy & Sell programme, Pension Scheme, Employee Share Ownership Programme, Various Health & Wellbeing Support Options, Gym Flex, Open Talent Market (internal mobility opportunities + access to mentors & projects globally), Shopping & Dining Discounts, Learning Portal #CVL
