

Cyber Security Specialist

[Apply Now](#)

Company: Locke and McCloud

Location: London Area

Category: other-general

DevSecOps Specialist – London hybrid - £80,000 - £95,000 + Bonus + Benefits Locke & McCloud are looking for an experienced DevSecOps Specialist with a strong background in security architecture, cloud security, application security, and DevSecOps to join our client as they look to expand their cyber security engineering function. This opportunity will allow you to step into an established, but growing security engineering function, lead and own various engineering initiatives, and work with some of the UK's very best cyber security professionals! Main responsibilities: Design and implement security architecture for systems and applications. Develop and maintain security policies, procedures, and standards. Implement and manage security controls and monitoring tools to detect and respond to security incidents. Work closely with development and operations teams to integrate security into the CI/CD pipeline and automate security testing and compliance checks. Provide guidance and support to development teams on secure coding practices and threat modelling techniques. Collaborate with cloud architects to design and implement secure cloud environments. To be considered for this role, you should have: Must have a strong background in security architecture, cloud security, application security, and DevSecOps practices. Strong knowledge of security principles, protocols, and technologies, including encryption, authentication, access control, and identity management. Experience with Kubernetes orchestration platform, including deployment, configuration, and management of containerised applications in production environments. Hands-on experience with cloud platforms such as AWS, Azure, or GCP. Expertise in application security testing tools and techniques, including static analysis, dynamic analysis, and software composition

analysis. Solid understanding of DevOps principles and practices, and experience with CI/CD pipelines, configuration management, and infrastructure as code. Alongside a super exciting opportunity to join an established but growing security team that will support your personal and career goals, our client offers a great benefit package that includes a bonus scheme, generous annual leave, training and development budgets, a pension scheme, private healthcare, flexible working, and more! If this role is of interest, please apply or reach out to Madison – 0203 854 2230/m.brookes@locke-mccloud.com. Locke & McCloud are the UK's leading cyber security & information security staffing company – through having a sole focus on the cyber & information security space we have been able to foster solid relationships with some of the UK's most exciting cyber security consultancies & end users. Our focus on the information security space allows us to be able to help you find the most exciting opportunities in the cyber security market. If you are on the lookout for your next cyber security or information security role, please get in touch!
