Cyber Security Systems Admin:

MC Dean is an emerging leader in Data Center manufacturing, construction, operations & maintenance, specializing in secure data centers environments. We are seeking a Facility System Administrator to join our Operations & Maintenance (O&M) team responsible for an overseas secure data center. This crucial role will involve managing the Risk Management Framework (RMF) scope for O&M operations, conducting network scans, and serving as the cybersecurity expert on the O&M team.

Key Responsibilities:

Manage RMF Scope: Responsible for overseeing the Risk Management Framework (RMF) scope for the secure data center's O&M operations. Ensure compliance with cybersecurity policies and regulations

Cybersecurity Scans : Conduct regular network scans and assessments to identify vulnerabilities and ensure the highest level of cybersecurity within the data center

Collaboration: Collaborate closely with O&M leadership and technicians to ensure seamless data center operations and effective cybersecurity practices

Government Interaction : Interact with government counterparts as needed to address cybersecurity concerns, provide updates, and facilitate information sharing

System Administration for Industrial Control Systems (ICS) : Responsible for

creating, modifying, and deleting user profiles and access levels on the facilities industrial control systems comprised of Utility Monitoring and Direct Digital Control systems

This is a **salaried** position expected to be on-site during the below hours; however, is expected to respond to site, and be available 365/24/7 as need specifically for escalation of critical incidents

Shift Schedule: Monday – Friday 0700 – 1530 (BST)

Qualifications:

Experience: Minimum of 5 years of hands-on experience in cybersecurity Risk Management Framework (RMF) implementation and compliance

Certification : Possession and willingness to maintain an IAT Level III certification as required by industry standards

Education : Hold a 4-year degree in an industry-standard field related to cybersecurity or information technology with 7-9 years of experience

Applicants selected will be subject to a government security investigation and may meet eligibility requirements, including , for access to classified information; **ability to obtain and maintain a DoD Top Secret / SCI with Polygraph Security Clearance required**

Desired Skills and Traits:

Team Player : Strong team player with the ability to collaborate effectively with colleagues at all levels of the organization

Communication: Excellent communication and collaboration skills to convey complex cybersecurity concepts clearly and concisely

Adaptability : Ability to work effectively in an overseas environment, adapting to different cultures and work practices

Independence: Ability to work in an environment where you may be the sole cybersecurity expert onsite

Abilities:

Exposure to computer screens for an extended period of time

Sitting for extended periods of time

Reach by extending hands or arms in any direction

Have finger dexterity in order to manipulate objects with fingers rather than whole hands or arms, for example, using a keyboard

Listen to and understand information and ideas presented through spoken words and sentences

Communicate information and ideas in speaking so others will understand

Read and understand information and ideas presented in writing

Apply general rules to specific problems to produce answers that make sense

Identify and understand the speech of another person

Applicants for this position may be required to obtain or provide proof of flu shots or of other vaccinations depending on customer requirements and nature of the position or demonstrate a valid basis for exception.
