## D365 CE & Power Platform Solutions Architect, Enterprise Consultancy, up to £100k

My customer are looking to bolster their CE & Power Platform capability after wins across multiple verticals (Central Government, Financial Services, Utilities, NfP and more) and wish to make 8 hires in this team by the end of March. They are an Inner Circle member, have 15+ Advanced Specialisations and have been shortlisted for Global Partner of the UK multiple times, so rest assured if you are seeking for quality of delivery and strong technical standards, these guys are well worth considering.

Two of the hires they wish to make are for Solutions Architects, who will operate as the main point of contact for truly enterprise-level customers during long-term, multi-million business transformation implementations from cradle to grave. Therefore, the role requires extensive experience as a Solutions Architect prior to joining. As you will be the main point of contact, it is expected that you will be willing to travel as per customer requirement.

For an organisation with the security and financial backing of a global Consultancy, they drive a small-company mantra internally, meaning that they operate in a meritocratic fashion with year-round promotion possibilities, ensuring that you will feel not only proactively appreciated in an enterprise environment, but also have your opinions heard on a day-to-day basis.

My customer wish to expand incrementally month on month, so joining the organisation at this time poses a great opportunity to grow vertically quickly - so if you wish to accelerate your career, with the help of your 'Career Coach' and access to one of the largest internal L&D capabilities in the UK, please reach out to [edward.collins@cognitive-group.com](mailto:edward.collins@cognitive-group.com) or call 020 3800 1306 to discuss further!
