

Deputy Head of UK Design & Engineering

[Apply Now](#)

Company: PwE Recruitment Group Limited

Location: England

Category: other-general

Are you looking to unlock a rewarding career in leadership with the opportunity to shape the future of design in modern engineering? Our global Client, are pioneer's in the industry, specialising in innovative use of steel, glass, and ETFE to create structures that contribute to ground breaking architectural landmarks. Deputy Head of UK Design & Engineering With UK offices in Surrey / Norfolk and the Southwest. Key Responsibilities: Assist in managing the Design and Engineering department, ensuring project deliverables meet timelines and standards. Lead in creating technical solutions, focusing on cost-efficiency and client budget considerations. Utilise industry-standard software for structural modelling, ensuring compliance with engineering and building codes. Innovate in structural, cladding, and connection detailing to optimize design and functionality. Provide leadership and technical guidance within the team, promoting a culture of excellence and innovation. Maintain up-to-date knowledge of software, tools, and product costs relevant to design and engineering processes. Communicate effectively with clients and team members to resolve technical issues and ensure project success. Ensure compliance with health, safety, and regulatory standards throughout project lifecycles. Foster interdisciplinary collaboration, attending and contributing to meetings with internal and external stakeholders. Qualifications and Requirements: Degree or equivalent in Structural Engineering, with membership in IStructE or ICE. Proven experience as a senior structural engineer leading multidisciplinary teams. Demonstrable skills in steelwork design, from concept through to fabrication, and knowledge of glass, grid shell, and connection design. Experience of working with Ethylene Tetrafluoroethylene (ETFE) would be beneficial. Proficiency in Rstab,

IDEA Statica, AutoCAD, and Microsoft Office Suite. Familiarity with British and European engineering, building, and design codes. Strong leadership, problem-solving, and analytical skills, paired with the ability to work under pressure and meet deadlines. Apply today and help shape the future of our built environment.
