

Design Engineering Lead

[Apply Now](#)

Company: Bluebolt Recruitment

Location: Loughborough

Category: architecture-and-engineering

We are seeking a Design Engineering Lead to work for a company in Loughborough who design and develop specialist equipment used in the water pipeline industry.

Working in the Loughborough HQ, you will personally lead and be operationally “hands on” undertaking the R&D work required to further develop our system. You will also be responsible for ensuring the workshop is operating in a clean and safe manner and the engineering team have your appropriate support to deliver their required tasks. You will be supporting the physical R&D infrastructure for complex problem investigation and product development. Further requirements include personal creation and management of the CAD data and relevant updates to the design data, supporting the ongoing review of materials including testing and analysis for the composite material aspects of the product.

You will ideally possess a degree level qualification or similar within an engineering discipline such as Mechanical Engineering, Electrical or Electronic Engineering.

You will be conversant with working in a technically challenging and innovative product R&D environment and delivering practical solutions to the engineering challenges. You will be well versed with using CAD systems for producing mechanical drawings working in a multi-disciplinary engineering environment and being able to develop and build solutions in a collaborative and highly ‘hands on’ manner.
