Design Integration Engineer

Location: Bristol (3 days on site – 2 days remote)

Duration: 12 Months

Start Date: ASAP

OUTSIDE IR35

A client based in Bristol is looking for several Design Integration Engineers for a initial 12 month contract.

- Integration of systems to be performed on wing, empennage, and boom structures of electric vertical take-off and landing (eVTOL).
- Act as Supplier Project Manager and responsible for routine progress updates.
- Design engineering using Catia CPD to support definition of composite demonstrators of Composite formed parts like spars, spar tool design, AFP design and RTM products, up to TRL-6.
- Design of structural detail parts, assemblies as necessary for supporting systems integration
- Each task will require coordination between internal, Structures and Electrical Wiring Interconnect Systems (EWIS), teams as well as external customer and partner stakeholders to gather necessary information to complete their tasks.
- Creating the digital mock'up (DMU) with standard parts (click bonds etc.), as well as any designed brackets and supports that may be necessary.

- Attending all key meetings and design reviews on-site is a must, although an element of hybrid working between office and Supplier sites is acceptable.
- Design for cost/manufacture services.
- Delivery and installation strategies, installation designs (red/green drawings), mod packs for installing hardware products onto platforms.
- basic design changes (Notes, standard parts in models etc.) in metallic detail parts and assemblies within CATIA.
