We are currently looking for a passionate DevOps Engineer with Software Development experience to become an aggregated part of our clients Defence Information Advantage team.

Your Role

In this role you will work with software developers, users, project and project managers, heads of engineering, quality assurance and IT colleagues. You will oversee code releases, deployments, and support operational systems. The role calls for both technical skills and soft skills to communicate effectively with colleagues at different levels in the organization in a collaborative and holistic environment.

What you'll bring

As a DevOps Engineer, you will have a degree level qualification in a STEM subject, or an equivalent level of practical experience.

Depending on your level of ability/experience, you will have familiarity, competence or expertise in a subset of these areas:

Cloud technologies:

- * Azure

- * AWS

Programming languages:

- * Java

- * Python

- * node.js

- * SQL

Data technologies:

- * Relational databases (e.g. PostgreSQL)

- * NoSQL databases (e.g. MongoDB)

- * Data streaming (e.g. kafka)

- * Big data (e.g. Hadoop)

Cyber security

- * Vulnerability management (e.g. tenable)

- * IDAM (e.g. Azure AD, Keycloak)

- * Static and Dynamic Analysis (e.g. SonarQube)

Architectural styles

- * Microservices

- * Serverless

- * On premise virtualization

- * Cloud

- * Edge compute

- * Containerisation (e.g. Docker, Podman)

- * Container management (e.g. Kubernetes)

* APIs (e.g. RESTful)

DevSecOps tooling

* Version control (e.g. Git)

* Continuous Integration/Deployment (e.g. Gitlab CI/CD)

* Unit testing (e.g. JUnit)

* Behaviour Driven Development (e.g. Cucumber)

* Infrastructure as code (e.g. Terraform, Puppet, Ansible)

If you would like to discuss this DevOps Engineer role in more detail, please send your updated CV to (url removed) and I will get in touch.
