

## DevSecOps Engineer Remote (2 days per month)

[Apply Now](#)

Company: hireful

Location: Hartlepool

Category: computer-and-mathematical

Keen on joining a rapidly growing (one of the fastest in Europe) tech platform company as their first DevSecOps Engineer? A company disrupting its industry using leading edge tech and supporting the green revolution? A company loved by its customers and employees alike (Glassdoor / Trustpilot). If so this could be the job for you..

Role DevSecOps Engineer aka DevOps Engineer, Azure DevOps Engineer, Azure Security Engineer, Platform Engineer, Application Security Engineer

Location – North East Nr Hartlepool, Middlesborough, Stockton-Upon -Tees 2/3 days in the office a month

Salary 65 – 75K + 25 days (Buy / Sell) 5% Pension, Free Gym, Annual Bonus, Health Cash

The role would be joining a small existing Devops Engineering / Platform team as the first designated DevSecOps Engineer. You will have the opportunity to take ownership of evaluation and implementation of security based tools (e.g. Vulnerability Scanners, Code Analysis, Automated pen testing etc) and Azure Security capabilities working with development, security and infrastructure teams. This is all taking place as they develop a brand new modern version of their platform.

Key Responsibilities:

Design and manage secure, scalable cloud solutions  
Develop and optimize CI/CD pipelines  
Implement Infrastructure as Code (IaC) with Terraform  
Integrate DevSecOps in software development  
Mentor and lead with a focus on automation and security

Looking for Candidates With:

5+ years in DevOps, cloud security, ideally Azure  
Expertise in Kubernetes and / or Azure DevOps with YAML pipelines  
IaC and Terraform  
Strong automation skills in PowerShell, Bash, Python  
Proficiency in Terraform and knowledge of SOLID principles  
Excellent problem-solving, leadership, and communication skills These would be a bonus

Azure Security skills e.g. in Azure B2c or Federated Account  
Experience with Application Security tools e.g. Vulnerability Scanners, Pen Testing, Code Analysis  
OWASP top 10  
Knowledge of C# for diagnostics  
Fantastic opportunity to join a fairly greenfield operation working on a new platform.

Interested? Please send your cv for a swift response!
