Gloucester

About the Role

Join Our Team as a DevSecOps I&T Engineer!

Are you passionate about integrating cutting-edge technologies while ensuring robust security measures? We're seeking talented individuals at all levels to join our dynamic team as DevSecOps I&T Engineers.

At Lockheed Martin we'll provide you with meaningful work and education opportunities that will allow you to develop your skills and enhance your career with us, but equally important you can also enjoy a strong work life balance. To ensure this we offer a flexible work schedule, hybrid work and a comprehensive benefits package to enable you to live a healthy fulfilling life in and outside of work.

You'll play a pivotal role in integrating, testing and securing a range of systems and applications. You'll be at the forefront of driving innovation and safeguarding digital infrastructures.

You'll need to have an understanding of DevSecOps principles and experience of working within a multi-disciplined team. Knowledge and understanding of core software tools, methods and frameworks to reliably integrate and deploy, integrate and test features into environments to ensure optimum outcomes to our customers.

Key Responsibilities:

Plan, Develop and Execute software test and integration plans ensuring compliance with specification

Develop scripts and integrate automated testing frameworks within CI/CD pipelines and a wider ecosystem of tools

Debug and identify defects in the whole stack, from front-end to back-end databased and middleware

Integration and delivery of large and complex solutions into a wider system-of-systems

Deployment in Public, Private and Hybrid Cloud environments and potential constraints

If you're passionate about DevSecOps and eager to take your career to the next level, we want to hear from you! Apply now to join our team and embark on an exciting journey of innovation and growth.
