Electrical Design Engineer

London

£60,000 - £70,000

*Bonus

*Career Development

*Hybrid Working

This role is working for one of the most exciting businesses in the renewable energy market! From a headcount of 70 in Jan 2023, they are on course to increase headcount by over 200% by the end of the year. You will be working for a global leader in their field working on some amazing energy projects incorporating over 30 different renewable energy technologies.

This company is one of the leading renewable energy & energy efficiency companies with over 70 offices worldwide and continuing their expansion into mainland Europe. They are emerging as one of the fastest growing sustainability companies in this sector, whilst

maintaining an impressively low staff turnover of an extremely high skilled team

Key Responsibilities

Designing and creating detailed design electrical layouts for DNO & ICP projects

Working with and producing cable route, equipment sizing, layouts, schematics, protection control, keyline and cable block diagrams

Act as specialist on electrical design matters internally and externally

Flexible hybrid working model - Site visits required

Background Required

Experienced an Electrical Design Engineer

Worked with transmission and distribution, DNO, ICP or other power projects

Experience working for DNO/DSO/ICP or design consultancy would be beneficial

Relevant Engineering Degree or experience

Electrical design engineer, electrical engineer, design engineer, electrical designer, high voltage, power networks, DSO, DNO, design engineer, ICP, network design, BESS, energy storage system, battery energy storage, solar, PV, photovoltaic, renewable energy system, utility scale, grid scale, Cleantech, Clean Technology, PV Solar, BMS, Boilers, Steam, Combined Heat and power, Power CHP, Energy Centres, Heat and power, Renewable Energy, Energy Asset Developer, Energy Efficiency, Biomass, Power Generation
