Company: HSB Technical

Location: Wroxham

Category: computer-and-mathematical

Position: Electrical Design Engineer

Job ID: 187/141

Location: Wroxham, Norfolk

Rate/Salary: £35-40k

Type: Permanent

HSB Technical Ltd is a specialist recruiter within the Power & Propulsion, Shipbuilding, Shipping & Energy and Aerospace sectors. We have a number of permanent and contract vacancies for multiple businesses across the UK and overseas.

The below job description will outline this position of: Electrical Design Engineer

Typically, this person will be designing electrical drawing packages containing electrical schematics, panel designs and cable running schedules.

HSB Technical's client is a very established and well-regarded business entity.

Duties and responsibilities of the Electrical Design Engineer:

- Follow electrical Design Change Request (DCR) process for specific ranges
- Check, update and issue accurate 2D Electrical schematic and panel drawings (AutoCAD)

- Development contract specific 2D CAD electrical information for production (AutoCAD)
- Work alongside of the Lead Electrical Designer and Wroxham Electrical Manager to achieve required deliverables and deadlines.
- Work to existing design standards for the client's Electrical systems.
- Work closely with the Electrical, Engineering and Joinery Departments.

Qualifications and requirement for the Electrical Design Engineer:

- A design related degree/qualification or equivalent electrical design experience
- Experience with marine digital switching systems such as CZone
- Experience with marine lighting systems and system integration
- In depth knowledge of Marine AC and DC electrical systems, materials and techniques
- Strong competency in computer literacy/aptitude using software including but not limited too: AutoCAD, Outlook, Excel and Word
- Good knowledge of all phases of electrical installation relating to small craft production
- Full UK Driving License
