Company: Serve Talent Ltd

Location: United Kingdom

Category: architecture-and-engineering

Job Title: Electronics Design Engineer

Location: Norwich, UK

Company Overview: Our client, a leading provider of advanced manufacturing solutions for the Ministry of Defence, is seeking a highly skilled Electronics Design Engineer to join our innovative team in Norwich. As pioneers in defence technology, they are dedicated to pushing the boundaries of electronic design to enhance national security.

Position Overview: As an Electronics Design Engineer, you will lead the design and development of complex electronic systems, contributing your expertise to critical defence projects. This role offers an exciting opportunity for a seasoned professional to make a substantial impact on cutting-edge technologies for national defence applications.

Responsibilities:

Lead the end-to-end design and development of electronic circuits and systems.

Create detailed schematic diagrams, oversee PCB layouts, and generate comprehensive design documentation.

Drive the prototyping and testing of electronic components, ensuring robust performance and reliability.

Collaborate closely with cross-functional teams to integrate electronic systems into larger defence projects.

Stay abreast of the latest advancements in electronics technology and contribute to technology roadmaps.

Qualifications:

Bachelor's or Master's degree in Electronics Engineering or a related field.

Proven experience in electronic design with a focus on defence or aerospace applications.

Proficiency in electronic design tools and software.

Strong understanding of schematic capture, PCB layout, and design for manufacturability.

Demonstrated problem-solving skills and a track record of successful project delivery.

Excellent communication and interpersonal skills for effective collaboration.

Continuous learner with a keen interest in staying ahead of industry trends.

Experience: Several years of relevant experience in electronics design, especially in the defence or aerospace sector.

How to Apply If you are an experienced Electronics Design Engineer with a passion for cutting-edge technology and a commitment to national security, please hit apply or contact Lewis Woollard direct on 01603 415 100.
