

Electronics / FPGA Engineer

[Apply Now](#)

Company: Octagon Recruitment

Location: Southampton

Category: architecture-and-engineering

An Electronics / FPGA Engineer job has become available for a technology business based in Southampton that focus on digital signal processing systems. They are growing their team and this addition will be joining a skilled development department.

This position is also open to a Junior / Graduate Engineer looking to gain experience in electronic circuit design, RF design, FPGA design, Digital Signal Processing and embedded software.

Key skills for the Electronics / FPGA Engineer job:

A 1st or high 2:1 in a related Engineering degree from a Red Brick University

An interest in mobile communications

Skills in any of the following areas: FPGA design, schematic capture, RF design, high-speed digital design, Digital Signal Processing or real-time embedded software development

This is a great opportunity to join a very well-established technology business that are a leader in their field.

Due to the nature of the work, applicants MUST be British citizens!

Apply now for the Electronics / FPGA Engineer job in Southampton, Hampshire.
