

## Electronics Production Engineer

[Apply Now](#)

Company: Serve Talent Ltd

Location: United Kingdom

Category: architecture-and-engineering

### Location: Great Yarmouth, UK

**About Us:** My client, a leader in offshore technologies, is seeking a skilled and motivated Electronics Production Engineer to join our dynamic team in Great Yarmouth. The specialise in developing cutting-edge solutions for the subsea industry, providing advanced technology to support underwater exploration and operations.

**Job Overview:** As an Electronics Production Engineer, you will play a crucial role in the production and manufacturing of our state-of-the-art subsea technologies. The successful candidate will contribute to the testing and assembly of electronic components, ensuring the highest quality and reliability in our products.

### Responsibilities:

Collaborate with the R&D team to understand and interpret electronic schematics and specifications.

Oversee the production process, ensuring the efficient assembly of electronic components and sub-assemblies for subsea technology products.

Conduct quality control checks to guarantee the highest standards of performance and reliability.

Troubleshoot and resolve issues related to electronic components during the production phase.

Work closely with cross-functional teams, including design engineers and project managers, to achieve project goals and deadlines.

Provide technical support and guidance to production staff as needed.

Implement and maintain best practices for electronics production processes.

**Qualifications:**

Bachelor's degree in Electrical Engineering, Electronics, or a related field.

Proven experience in electronics production and manufacturing, preferably within the subsea or marine technology sector.

Strong understanding of electronic components, PCBs, and assembly processes.

Proficiency in using relevant tools and equipment for electronics testing and troubleshooting.

Excellent problem-solving skills and attention to detail.

Effective communication and collaboration skills.

Familiarity with industry standards and regulations related to subsea technologies.

**Benefits:**

Competitive salary

Day shift - core hours

Professional development opportunities

Collaborative and innovative work environment

Opportunities for career advancement
