An Embedded Software Engineer position has become available within a company that supplies pioneering technology to the ever-changing automotive industry. Supplying to a broad range of customers right across the globe, this client is working through a considerable period of growth and is looking for the right Software professional to help drive existing and upcoming projects. The successful Engineer will gain a competitive package and the opportunity to work for a business that dominates the market.

Embedded Software Engineer duties include:

Design, validate, and test chassis ECU software while defining system/software requirements.

Develop and manage software development plans, test cases, validation plans, bug fixes, and releases.

Provide support for fault finding, software debugging, and network integration.

Conduct testing and validation of chassis systems in alignment with associated systems' Development Verification Plan (DVP) & System requirements.

Ensure compliance with ISO 26262 standards for system validation.

Implement ASPICE working practices.

Embedded Software Engineer desirable skills/experience:
Strong knowledge of Model-Based Design using MATLAB and SIMULINK.

Experience within OEM or Tier 1 Automotive industry.

Ability to create and validate software test cases.

Knowledge of software integration, software release baselines, diagnostics (ODBII) requirements, and CAN messages/signal definition.

Strong understanding of electronic component test validation and certifications.

Bachelor's degree in Electronics, Software, Control Systems (or similar).

Embedded Software Engineer benefits include:
A salary of circa £55,000 per annum.

33 days annual leave (including bank holidays).

A supportive environment for career progression.

Opportunities for training and further education.

Friendly working environment with a family-like culture.

Comprehensive pension and benefits package, including childcare support, cycle scheme,

and retail discounts.

Free Parking / Company events.

If interested in this Embedded Software Engineer position, please apply through this advert immediately.

ASC Connections Ltd acts as an employment business for temporary positions and an employment agency for permanent positions. We are committed to equal opportunity and diversity.
