

Engineering Team Leader - Automation -Distribution

[Apply Now](#)

Company: Minstrell Recruitment Ltd

Location: Liverpool

Category: architecture-and-engineering

Job Description

Engineering Team Leader – Automation / Distribution / Manufacturing

£47,000 plus £5,000 shift allowance

42 hours a week (phone number removed) (panama shift)

276 hours holiday a year

Location – Liverpool L33

I am currently looking to recruit an Engineering Team Leader to join my client based in Liverpool.

Job Summary

Reporting to the Site Manager/Supervisor, the Team Leader will support managerial duties and ensure that the company provides a fully functional automation system that offers exceptional customer service. This is a critical role, and the Team Leader will have experience in leading and coordinating a team of maintenance engineers and carry out hands on maintenance to ensure the plant runs smoothly and efficiently.

Key responsibilities

- * Promote a strong safety culture and adhere to Health & Safety and statutory procedures
- * Prepare and chair Daily Review Meetings with Key Stakeholders
- * Provide emergency breakdown support on all equipment and software, managing issues and adhering to the internal escalation process in partnership with the customer.
- * Control maintenance activities on site, speed of response and quality of repair and standards of workmanship.

- * Coordinate a team of onsite engineers and third-party repair companies with their activities on site.
- * Undertake analysis of CMMS data to assist forward planning for CI opportunities
- * Maintain Quality of Service by ensuring high quality communications between both customers and the company
- * Ensure that reports are well written and legible
- * Ensure that all spare part usage is accounted for
- * Provide flexibility and the best use of skills and capabilities of the maintenance team on site
- * People Leadership including delivery of performance reviews, development and coaching of team, dealing with employee relations issues and employee welfare and wellbeing
- * Manage the day to day running of the team, including tasks such as approving holiday bookings and holding return-to-work meetings
- * Act as a role model demonstrating company values

Skills, qualifications and experience

Proven history of strength in people leadership and development

A recognised engineering qualification (ONC minimum), ideally HNC or above

Minimum 3 years' experience in a relevant transferrable industry or service.

Hold an IOSH certificate & adhere to all company/ customer legislative and H&S procedures

Recognised apprenticeship in an engineering field would be desirable
