Environmental Consultant (All levels)

[Apply Now](#)

Company: OHES Environmental

Location: United Kingdom

Category: other-general

Who we are

The Adler & Allan group provide environmental and energy infrastructure services that protect the environment and reduce the risk of pollution, operational downtime, profit loss and reputation damage for our customers.

As part of the Adler & Allan group, **OHES Environmental Ltd** provides multi-disciplinary environmental consultancy services that protect the environment, whilst reducing the risk of pollution, profit loss and reputational damage for our clients.

Operating from sites UK wide, we combine technical expertise with a pragmatic and commercially focused approach. Our solutions help our clients achieve their business and sustainability goals, by understanding, managing, and reducing the environmental risks associated with land transactions, property development, day-to-day operations and following pollution incidents.

We are an ambitious team who are focused on growth, putting our customers at the heart of what we do, and we live our values of Safety, Service, Working Together, Wellbeing and Expertise. Our culture is can-do, fun and where everyone has a part to play. We're looking for driven and enthusiastic Environmental Consultants at all levels to join our established teams across multiple locations across the UK.

If you want a hands on role helping businesses and protecting the environment, this

role could be for you!

What we would like to offer you:

Competitive starting salary

Company vehicle or car allowance

Company Pension scheme

Refer a friend scheme

25 days annual leave per year, plus bank holidays

Company phone, laptop, iPad and PPE provided

Training and development opportunities (with support and a clear path of career progression)

Life Assurance Scheme (4 x annual salary)

Home-based roles and flexible working options available

Employee Assistance Programme - EAP (with access to GP appointments, physio appointments and mental health support)

Enhanced Maternity, Paternity, Shared Parental and Adoption pay

A diverse and inclusive working environment

Opportunities for overtime

Free eye tests and money towards glasses

Environmental Consultant Roles:

We are seeking aspiring and driven individuals who are looking to develop their skills, broaden their experience and progress their careers within the environmental sector. We are recruiting for Environmental Consultants throughout the UK at all grades ranging from Graduate Environmental Consultant to Principal Environmental Consultant.

The post holder will utilise their technical knowledge of contaminated land consultancy, to carry out environmental investigation, assessment, reporting and remediation verification whilst carrying out project management duties as part of a regional delivery team.

Most of our roles are home-based, with core hours on a full-time basis of 9am to 5pm Monday to Friday. Regular attendance to sites and offices is required and there may be a need for the postholder to satisfy overtime requirements. Occasional overnight stays away from home may be required dependent on work location and business demands at the time.

Key tasks and accountabilities will vary with each role, with overall responsibility increasing with senior positions. A non-exhaustive outline of tasks associated with our Environmental Consultant roles are provided below:

- Delivery of environmental consultancy services and project management of environmental incidents and planned investigations to support clients with the management of their assets.

- Arranging and supervising emergency response works, geotechnical and environmental site investigations and remediation strategies to deal with contamination in the environment.

- Liaison with stakeholders at all stages of the project lifecycle including clients, contractors, and homeowners.

- Collection of field data, including soil, groundwater and vapour samples for subsequent laboratory analysis.

- Logging of soils during investigations to a high standard and in accordance with best practice

- Preparing health, safety and environmental documentation including risk assessments and method statements along with reporting of H&S near misses and positive observations.

- Production of factual and interpretive environmental reports, which are technically

sound and commercially focused, to include risk assessment and conceptual site models (CSMs).

Demonstrating a commitment to ensuring consistently high levels of safety, technical robustness, commercial awareness, organisation, and customer satisfaction

Undertaking quality assurance and safety performance audits

Participating in business development activities as a technical advisor and managing key clients

Person Specification:

All applicants are expected to hold a degree in a relevant earth science or geo-environmental discipline. The skills, knowledge, and experience listed below are required for the majority of our roles. At entry level, knowledge and experience of the below will be considered as beneficial but not essential.

Relevant experience in managing environmental incidents, carrying out contaminated land surveys and site investigations, with knowledge of available investigation techniques and testing.

Hands on experience in the management of geo-environmental projects to facilitate site redevelopments, acquisition and disposal.

Experience of operating on contaminated land projects and application of remediation techniques to deal with identified contamination.

A working knowledge of key guidance and standards including Land Contamination Risk Management (LCRM) and BS10175 Investigation of Contaminated Sites.

Proficient in logging soil and rock in accordance with BS5930

Competent and diligent in the production of technical reports that are commercially focused and to meet challenging deadlines.

The ability to work in a team and also demonstrate the drive and self-motivation to work independently, with minimal supervision.

Excellent interpersonal skills and the ability to effectively communicate via clear and prompt written and verbal communications to colleagues, clients, contractors, regulators, and other consultants.

The ability to manage projects to meet deadlines and budgets.

Experience / sound knowledge of current and emerging environmental legislation, guidance, and best practice applicable to contaminated land consultancy.

Be a member of a relevant professional organisation.

Be computer literate and proficient in the use of Microsoft applications.

As there will be travel to any location within the Company's operational footprint, possession of a full UK driving licence is essential for this role. In addition, a full Criminal Records Check will be required due to the environments in which the post-holders will be deployed. All applicants must have right to work in the UK, and will be subject to a DBS check due to the nature of the environments we work in.

Employee Testimonials:

I am regularly 'out in the sticks' and often work in the Lake District, the Peak District, the Yorkshire Dales, the North York Moors, Northumberland, Snowdonia, and occasional the Scottish Borders and the Cairngorms. As someone that loves the countryside and mountainous landscapes, I really enjoy the travel my job brings! **Chris, North**

Consultancy team

My favourite part of the role is undoubtedly making a positive difference to the environment, by helping to reduce the impact of fuel spills and reduce the chances of them happening in the future. This is on par with the sheer variety of sites and places that I visit on the job, with each week having something new to look forward to and experience. -

Harry, East Consultancy Team

I enjoy the dynamic nature of the work that I do, each job I work on is unique and presents

its own challenges - Rob, Water Quality Team

If you are looking for a change and are interested in the above, please apply today or contact for additional information!
