- Hybrid working
- Amazing Benefits package and progression

Join the team who are proud to take on some of the world's most exciting and prestigious construction challenges. Join us and you'll be part of our genuinely collaborative environment, where everyone is supported to make the most of their talents.

As one of our Estimators, you'll be part of a multidisciplinary team, making a tangible, sustainable impact on the world around us. You'll work closely with the Senior Estimators and other teams helping to ensure accurate reporting, benchmarking, and analysis of our clients' infrastructure costs. You'll never have to stop developing. Our portfolio of structured training will help you expand your career in line with your aspirations.

Knowledge:

Ideally, candidate should have some experience on Infrastructure projects.

Understanding of the Cost drivers that define a project and ability to convert engineering data into meaningful cost drivers.

Understanding of all aspects of direct and indirect costs and how to put together an estimate.

Communication and interpersonal skills, with the ability to present cost work concisely.

Ability to challenge colleagues in a constructive manner to achieve positive outcomes.

Responsibilities :

Ability to work independently to produce estimates at various stages of a project using various methods of measurements and estimating software.

Aid in the development of benchmarking database and reporting process to provide timely and accurate advice to inform decision making.

Support implementation of accurate Cost measurement processes including progress and performance measurement.

Provide professional advice on cost to stakeholders (including but not limited to Procurement Specialists, Cost / Contract Management Personnel, Estimators and Project Controls) for our clients.

Ensure continuous development and improvement of Client's policies, procedures, and resources for all cost and related controls services.

Work closely with the Scheduling Team to ensure integration and alignment of cost models and schedules.
