Field Service Engineer

Scientific Laboratory Analytical Instrumentation

FULL TRAINING PROVIDED FOR ELECTRICAL-MECHANICAL SERVICE ENGINEERS
FROM ALL SECTORS

£45K - £50K + Car + Excellent Benefits Package including

South East - Crawley, Croydon, Guildford, Farnborough, Basingstoke, Reading, Slough,
Brighton, Portsmouth and Southampton

An excellent opportunity for a Field Service Engineer or an ex HM Forces Engineer (Navy, RAF or REME), with a background working with high value electronic or electro-mechanical capital equipment, to join a market-leading supplier of sophisticated Scientific Laboratory Analytical Instrumentation

The Company – Field Service Engineer, Analytical Instrumentation

My client is a leader in the supply of sophisticated laboratory based analytical instrumentation, used in a wide range of applications, including automation and robotics,

measurement systems, and optical visualisation systems.

Their systems are trusted by scientific professionals to deliver 'best in class' product solutions across their key markets, which include life science research, laboratory diagnostics and the food and beverage industries.

This organisation operates at the forefront of technology and innovation, with an unrelenting commitment to research and development, world class manufacturing facilities, and the recruitment of good people central to their future success.

The Role - Field Service Engineer, Analytical Instrumentation

Following expansion, this market leader in laboratory technology now seeks to recruit a technically motivated and customer focused Field Service Engineer, responsible for the planned preventative maintenance, service, breakdown and repair of a wide range of leading edge Laboratory Instrumentation, based at customer sites throughout the above region.

This role is home based, and will involve travelling to customer sites throughout the territory, ensuring that the highest levels of customer service are maintained at all times.

Your Background – Field Service Engineer, Analytical Instrumentation

Suitable candidates for this exciting role will need to possess a qualification in Electronics, Engineering or Science, and have gained experience working in a customer facing field service or technical support environment, or be an ex HM Forces Engineer, looking for your first move into field service.

Full and comprehensive product training will be provided, so applicants are welcome from Service Engineers from a broad array of backgrounds and industry sectors.

The Benefits - Field Service Engineer, Analytical Instrumentation

This is a truly excellent opportunity to join a world-class supplier of laboratory

instrumentation. You will be joining a national team of engineers who take great pride in their work and who aim to build upon long-term relationships with customers. You will be continually challenged as you are exposed to new technologies. You will receive constant support and guidance from senior management and your technical knowledge will be furthered through ongoing training courses across a broad range of instrumentation. For those with the desire there are opportunities to progress your career into more technical specialist roles.

An excellent salary of up to £45K is accompanied by a generous benefits package, which includes a 10% Bonus, fully expensed company car, life assurance, pension scheme, lunch allowance, laptop, mobile phone and the opportunity to progress your career within a truly market leading technically innovative organisation.

This vacancy is being advertised by TRS Consulting (UK) Limited. The services advertised by TRS Consulting (UK) Limited are those of an employment agency and / or employment business.
