

## Field Service Engineer - HPLC/LCMS

[Apply Now](#)

Company: Hyper Recruitment Solutions LTD

Location: Manchester

Category: architecture-and-engineering

We are currently looking for a Field Service Engineer to join a leading Life Science company based in the Milton Keynes area. As the Field Service Engineer you will be responsible to install, validate, maintain, and repair analytical laboratory equipment across the UK.

The role will cover the North West/ Manchester with occasional travel across the UK.

### KEY DUTIES AND RESPONSIBILITIES:

Your duties as the Field Service Engineer will be varied however the key duties and responsibilities are as follows:

1. You will be well-versed in all HPLC products, with a focus on the pertinent Service Schedules that are offered to the companies clients.
2. The Field Service Engineer will work as part of an experience team offering first class customer support and with time will also move onto cover LCMS single and triple Quads.
3. You will perform installation/validation of new instrumentation (IQOQ.PQ Testing) and maintain accurate inventory of spare parts in car stock.
4. As the Field Service Engineer you will also report of all the Service jobs using SAP in a

timely manner whilst troubleshooting with 48 Hour Response times.

#### ROLE REQUIREMENTS:

To be successful in your application to this exciting opportunity as the Field Service Engineer we are looking to identify the following on your profile and past history:

1. Relevant degree in a scientific discipline is ideal.
2. Proven industry experience in HPLC / LCMS as well as a background of maintenance and troubleshooting skills in a GLP/GMP environment.
3. Experience with other Analytical Instrumentation such as MALDI, Prep LC and SFC is beneficial but not essential.

Key Words: Field Service Engineer | HPLC | LCMS | MALDI | Prep LC | SFC |  
Maintenance | GMP | GLP | Service Schedules | Installation | Validation |  
Instrumentation | IQOQ | SAP | Troubleshooting |
