#### Field Services Engineer

### **Apply Now**

Company: Bartech Marine Engineering - Engine Experts - O&G | Marine | Industrial

Location: United Kingdom

Category: other-general

Ready to join the UK's leading family owned engine maintenance team where you can build on the 35 years of trading and be part of the continued success? You'd be joining a company with responsibility for more engines than anyone else in the North Sea, covering 192 on long term service agreements, though we are not confined to just the UK, with partnerships across the globe, particularly in the Middle East and Africa. As part of the team, you will be able to extend your skills with OEM training through our dealerships (MTU, MAN, Geislinger) and beyond thanks to other industry relationships. To support you in looking after these safety and operationally critical engines, there will be a focus on a work to life balance as well as full project, technical and commercial teams to deliver successful projects. In this Field Service role to the oil and gas sector, you will need to be available to mobilise within 24 hours for projects upto 21 days in duration when on call, but reimbursed with compensation days off and a healthy holiday allocation to be taken when you want. If you have a passion for engineering, especially reciprocating engines and a high attention to detail, Bartech Marine Engineering continues to expand and we are looking for experienced, dependable engineers, helping us to support our growing customer base in the oil and gas, marine, power generation and other industries reliant on land based engine applications. Working from impressive facilities in Colchester and Aberdeen and representing OEMs MTU, MAN, Baudouin and Geislinger we are at the leading edge of engineering and need to add to our committed, enthusiastic and friendly team to help us maintain the high standards our customers expect. Dealing with high and medium speed engines old and new, across oil and gas, marine and land based applications means you should relish the excitement (and sometimes challenges) that this

mix brings. With customers working 24 hours a day, you will need to have the flexibility and commitment to react to their needs. This role is home-based, and you need to be available to travel nationally (or possibly overseas) or to the workshop when required. In return for your hard work and commitment, you will be rewarded with competitive rates, with the chance for a work/life balance and a great benefits package, as well as the opportunity to develop yourself personally and professionally with OEM training and progression pathway.
