Full Stack Developer

Apply Now

Company: Software Development & Engineering

Location: Reading

Category: computer-and-mathematical

Full Stack Developer opportunity to join an award winning Intelligence Software Engineering company doing high level work across multiple sectors including Defence, working with the UK Government. The role is offered on a fully remote basis.

Full Stack Developer Position - Fully Remote - Up to £80,000 + Bens

To be considered for this role you must be SC Cleared or able to obtain Security clearance -

That means you must be a British Citizen and have been living in the UK permanently for the last 5 years *

As a Full Stack Developer, you will join one of our small, fast-paced, agile delivery teams; using agile methodology and DevOps techniques to build backend systems, data processing pipelines and progressive web applications. You will be working on cutting edge technologies alongside some of the best software engineers in the UK.

The company is interested in people with experience in one or more of the following technologies:

Java, AWS, React & TypeScript, (Any DevOps experience is desirable)

You will ideally have experience in:

Contemporary software engineering including selection and application of appropriate technology and patterns.

DevOps and the techniques which enable it - including virtualisation, containerisation, continuous integration, continuous deployment and infrastructure as code.

Confidence developing full-stack solutions as a polyglot developer/engineer.

Working in agile environments using methodologies such as Scrum and Kanban.

The company offers fantastic benefits including **Full Remote working, career coach, 5 days paid training, Toil (flexible working hours to suit your life), Pension, Share Scheme, Bonus**

You will specialise in the use of open source libraries and components and will use tools like GitLab to build continuous integration pipelines ensuring software is of the highest quality and is secure. You will deploy software to multiple environments including public (AWS & Azure) and private cloud.
