

Golang Engineer – High Growth Crypto Scale up

[Apply Now](#)

Company: Propel London

Location: United Kingdom

Category: architecture-and-engineering

Job Description

The Role

This is a great opportunity for a mid or senior level Golang engineer to join a rising fintech challenger brand. As a senior Golang engineer you will develop and design microservices for transactional and event driven architectures in the fin tech sector. You will take ownership of projects working autonomously to deliver projects from the ground up!

You will –

Work closely with the head of engineering to deliver design and deploy a number of greenfield projects.

Evaluate the best technologies to use for the tasks at hand.

Establish standards for backend development

Discussing systems architecture

Writing understandable and easy to maintain code.

Ensuring high performance for our API's

About you

As a Golang Engineer for this high growth crypto exchange you will –

Good Experience of Golang.

Have a good knowledge of web environments and api design.

Strong knowledge of cloud native engineering

Must have experience in PostgreSQL or MySQL
