Company: EQUANS

Location: United Kingdom

Category: other-general

INEO NUCLEAR UK, a company of EQUANS (BOUYGUES group) is looking for a **Head of UK Design Authority and CDM**

What is your working environment ?

Ineo Nuclear UK, a subsidiary of Ineo Nucléaire, is in charge of nuclear projects based in the UK and wider Europe. Its expertise remains focused on the electrical / instrumentation / electromechanical scopes, but with a view to also develop multi-technical integrated projects. In the UK we are currently a strategic partner on the Hinkley Point C (HPC) project the construction of 2 new EPR units in the South West of England.

What is your role?

Carryout a CDM review of construction drawings and associated supporting documents in agreed template

Comment, follow progress and when required find technical solutions for Technical Deliverables for topics including but not limited to: Generic Deliverables: mounting configuration, principle of implementation, cable specification, interface document, ECS coding,) Execution Deliverables: layout drawing, block cable diagram, consumer list, cable list, system schematic,)

Work closely and collaboratively with the Ineo Engineering Manager, Building Managers and Design Team

Keep senior management and other stakeholders routinely informed of project status and all developments that may impact schedule and Nuclear safety through regular reports

Collaborate with other contractors to find optimised integrated solutions, challenges technical options and supports the internal preferred options

Attend meetings with the Client (NNB) and with other contractors (MEH and the other electrical contractors) in Bristol, Paris or Lyon

Report weekly to the Project Manager the downstream key information (actual news, changes, blocking points, etc.)

Ensure that NNBS technical requirements (in his/her field of expertise) are designed in accordance with British Standards/European Standards

Provide technical assistance on the production of electrical design deliverables provided by us

Develop and implement engineering design solutions inhouse in accordance with British Standards and best practices

Develop technical specifications and supplier documentation in accordance with British Standards

Perform design analysis and checks in accordance with British Standards and best practices

Perform independent verification on deliverables classified as QRAs, in accordance with the requirements of the General Quality Assurance Specification

What profile are we looking for?

Experience in the Nuclear sector

Have a good knowledge and understanding of the British Standards for electrical design and installation works (BS)

Ability to navigate Naviswork and use for review and assessment purposes
