Company: 00139 LEIDOS INNOVATIONS UK LTD.

Location: United Kingdom

Category: computer-and-mathematical

Infrastructure Architect

Location: UK Mobile Worker (mostly remote working with in office as required)

Leidos are currently seeking an Infrastructure Architect to work as part of the engineering team working with our Government clients. This is a varied role and requires someone adaptable to change requests, the ability to re-architect designs and be able to identify solutions across both legacy and on-premise systems and services.

As an Infrastructure Architect you will provide leadership, assurance and technical governance of the system solution as a whole, covering technical, service and process aspects. You will call upon other subject matter experts (SME's) and technical architects to assist you in developing solutions that meet the customer requirements, whilst engaging with systems engineers to ensure that solutions are deliverable and maintainable.

Joining this team you will play a role in the ongoing cloud migration project in addition to supporting changes to the existing on-premises solution, providing Infrastructure solutions expertise into both support teams.

You will be tasked with working on multiple changes and will be accountable for the infrastructure solution design, to ensure that each change appropriately integrates with the current mission critical legacy systems and meets the customer needs, including functionality, timescales and costs.

What will I be doing?

Defining technical solutions that are acceptable to the client within the project constraints of cost, schedule, resources, and risk.

Production of high/low level designs that can be used by the engineering team to build a compliant solution.

Engaging with the Chief Engineer, Lead Systems Engineer and Project and Programme Managers to ensure that solutions are both deliverable and maintainable.

Engaging with the customer to clarify requirements and how they can be met.

Represent the company on technical advisory boards and client governance boards.

Be the point of contact for client technical issues and requirements clarification.

It will your remit to approve customer requirements and technical designs. In addition you will be reviewing Technical Documentation and providing sign off and Technical Governance.

What do we need from you?

Experience in objectively developing technical solutions to customer problems.

Provide overarching architectural guidance and governance.

The ability to work under pressure in large multi discipline teams to tight schedules.

The ability to lead architecture and engineering teams within the larger project.

Be able to engage with stakeholders from multiple areas of the business including product design, service design, operations including the client.

Apply excellent written, verbal, and visual communication skills to explain complex topics concisely to both technical and non-technical audiences.

You should be a self-starter and be able to work with other engineering team members to ensure that the design is complete and ensuring that the lower-level design work is consistent with your high-level designs.

It would be beneficial for the role if you had the following:

Previous experience of creating Infrastructure Solutions within a mission critical or business critical environment

Excellent knowledge of infrastructure technologies and security boundaries.

Good all round technical knowledge of both Linux and Windows environments and application hosting.

Security Management knowledge and experience.

Service Architecture knowledge and experience.

An appreciation of SAFe/Agile delivery Methodologies.

Invent the future with Leidos UK! We pride ourselves on tackling the world's toughest technical problems through innovation. Join us, be a part of the solution!

Clearance: **Candidate must a UK National and be eligible to obtain SC clearance.**
