Company: Corriculo

Location: Bristol

Category: computer-and-mathematical

Job Description

InfrastructureEngineer, Windows Server, SQL Server, Microsoft O365, VMWare, Hyper-V, COR5451

The Role

This is an excellent Infrastructure Engineer role, working for a company with a growing reputation in their field. The Infrastructure Engineer will use their knowledge of working in Windows environments with experience of windows server and SQL Server as well as virtualisation skills using Hyper-V & VMWare to join a small, well-established infrastructure team working on crucial business projects.

The Company

The Infrastructure Engineer will join an established property management consultancy who boast more than 15 years of industry experience. They are not only a leader within the UK market, but are also branching out within Europe.

As their client-base grows, so does their employee count, but this doesn't take away from the approachable and family-oriented environment that has been developed over the years! This is a truly great place to work and develop your career, where you will be a heard voice and a valued team member. The current work pattern in place is full-time in office based-in Bristol with the opportunity to move to hybrid working after an initial integrationary period.

Benefits

Some of the benefits on offer for the Infrastructure Engineer, include:

22 days holiday + BH, increasing with length of service. You'll also get an extra day for Christmas and your birthday!

Discretionary company bonus

Annual salary reviews

What's Required?

The Ideal candidate for the role will have some of the following:

Prior commercial experience within a similar Infrastructure Engineer role working across Windows Server, SQL Server, Active Directory, and the wider Microsoft 365 suite

Good experience and knowledge of virtualisation including skills with Hyper-V and VMWare

Any experience of networking including SD WAN and VoIP as well as experience with cloud technologies would be advantageous

The list above is important, but not as important as hiring the right person! So if you don't meet all of the criteria above, but feel the role is of interest, please apply or get in touch today to discuss further.

So What's Next?

If you are a Infrastructure Engineer currently, or looking to harness your career in this direction, and would like to know more about this excellent opportunity; apply now for immediate consideration!

Infrastructure Engineer, Windows Server, SQL Server, Microsoft O365, VMWare, Hyper-V, COR5451
