

Infrastructure Engineer

[Apply Now](#)

Company: Kinetech

Location: London Area

Category: construction-and-extraction

High growth PE backed business requires an IT Infrastructure Engineer. This will be a sole role in IT working with the support of an MSP. About the role: Responsible for designing, implementing, and maintaining the IT infrastructure, including cloud services, network devices and VPNs, servers (where these are required to support legacy applications), and security systems. Analyse the current IT infrastructure, applications, and data of acquired businesses and develop a strategic plan for enhancing security measures in the short term and creating a roadmap for long-term migration. Plan and execute migrations of data (local, Dropbox, OneDrive, Google drive) and email (Exchange, Gmail, personal accounts) for each acquired business and implement Microsoft 365 services and applications. Implement and enforce security policies and best practices for the Microsoft 365 environment. Implement and maintain a secure backup solution for Microsoft 365 and other business data to ensure confidentiality, integrity and availability of all company data. Monitor, troubleshoot, and resolve issues related to Microsoft 365 services and applications. Provide technical support and guidance to end users on Microsoft 365 services and applications. Document and maintain the IT infrastructure architecture, configuration, and procedures in collaboration with the Managed Service Provider. Maintain, configure, and manage the Microsoft 365 environment, including Entra, Exchange, Defender, SharePoint and Intune. Provide training and support for the users and administrators of the acquired business on how to use and manage Microsoft 365. Monitor and evaluate the performance, availability, and security of the migrated IT infrastructure and applications and resolve any issues or incidents. Support the selection of an ERP system and support its implementation across

sites. Requirements Experience of IT integration in a business acquisition context. Ideally with experience running concurrent integrations and/or integrating a significant number of small acquisitions where often the entire tech stack is replaced. c.3 years of experience as an IT Infrastructure Engineer, IT Project Engineer, System Administrator, or similar role. c.2 years of experience in administering and managing Microsoft 365 services and applications, including Entra, Exchange, Defender, and Intune. Familiarity with Cyber Essentials and Cyber Essentials Plus is desirable. Strong knowledge of Microsoft 365 architecture, features, and best practices. Strong knowledge of cloud computing, networking, security, and backup technologies and solutions. Strong troubleshooting and problem-solving skills. Strong communication and collaboration skills. Certification in Microsoft 365 or related technologies is a plus. The role will be remote, but with the expectation of UK wide travel on a weekly basis to meet with the acquired businesses. This will be expenses, but a UK driving license and access to a vehicle will be essential. Please apply today for immediate CV review. Kinetech is acting as an employer in relation to this role. Please see our website for more information on how we handle your data.
