Infrastructure Engineer - Support Focused

[Apply Now](#)

Company: Sure Staffing

Location: London

Category: computer-and-mathematical

Join a dynamic team of professionals shaping the future of financial services! We're seeking an adept and versatile Support Focused Infrastructure Engineer and support specialist to collaborate closely with our Head of Technology. While the primary focus is on support, you'll also contribute to exciting projects as our fund expands and evolves its tech infrastructure.

You'll be at the heart of all things infrastructure-related, ensuring smooth operations and driving innovation. Plus, get ready for some adventure as occasional travel across Europe working with some of our clients.

Desired Skills and Experience:

VMWare: Unleash your expertise in designing, configuring, and troubleshooting. Experience with VVOL and SPBM is a huge plus. Knowledge of VMware View adds extra value.

Citrix CVAD: Dive into administration and troubleshooting to elevate our systems. Your expertise here will be invaluable.

Exchange: Show off your prowess in administration, configuration, and troubleshooting.

SQL: Flex your muscles in designing, configuring, and troubleshooting SQL systems.

Experience with SQL Always On is a significant advantage.

Veeam: Lead the charge in administration and troubleshooting to ensure seamless data management.

Cisco Networks: Your experience in switching and routing is highly desired. Don't forget your knack for configuring switch ports!

Palo Alto Networks: Bring your expertise to the table for robust security solutions.

Juniper Networks: While not a must, experience with Juniper switching is a desirable asset.

HPE, Dell, Pure: Your familiarity with these brands is a definite plus.

Solarwinds: Your experience here will be a valuable addition to our toolkit.

Scripting (Python, Anaconda, PowerShell): Your proficiency in scripting languages will be highly valued as we automate and optimize processes.
