

United Kingdom Jobs Expertini®

Infrastructure Engineers

[Apply Now](#)

Company: CGI

Location: United Kingdom

Category: computer-and-mathematical

Position Description:

Locations: Gloucester, Bristol, Chippenham, Reading, London, Leatherhead, Leicester, Manchester

CGI was recognised in the Sunday Times Best Places to Work List and has been named one of the 'World's Best Employers' by Forbes magazine. We offer a competitive salary, excellent pension, private healthcare, plus a share scheme (3.5% + 3.5% matching) which makes you a member not just an employee. We are committed to inclusivity, building a genuinely diverse community of tech talent and inspiring everyone to pursue careers in our sector, including our Armed Forces, and are proud to hold a Gold Award in recognition of our support of the Armed Forces Corporate Covenant. Join us and you'll be part of an open, friendly community of experts. We'll train and support you in taking your career wherever you want it to go.

The Space, Defence and Intelligence business unit in CGI is a true IT Systems Integrator. We work, build, and operate bespoke, technically complex, mission-critical systems which help our clients keep us all safe and secure. We bring innovation to our clients using proven and emerging technologies, agile delivery processes and our deep expertise across the breadth of space, defence, intelligence, aerospace and maritime, all underpinned by our end-to-end cyber capability. We work collaboratively with global technology companies, cutting edge SMEs and academia to deliver the optimal solution for each client.

Your future duties and responsibilities:

As an Infrastructure Engineer you will:

- Seamlessly integrate development outputs into release modules.
- Spearhead their progression through relevant stages into operational service.
- Navigate the release-to-service process, including security and accreditation procedures.
- Provide technical insights and expertise on designs, solutions, tools, techniques and standards.
- Provide hands-on development of pragmatic solutions for real-world challenges.
- Troubleshoot, investigate and resolve incidents.

Required qualifications to be successful in this role:

A proven track record in the following domains:

- Windows and/or Redhat Linux server administration.
- Proficiency in scripting languages like Python, Java, PowerShell, and Bash.
- Expertise in configuration and automation tools such as Ansible, Puppet, and Foreman.
- Familiarity with container technologies such as Docker and Kubernetes.
- Command over virtualization technologies including VMware, Hyper-V, and OpenShift.
- Sound grasp of network fundamentals encompassing DNS, DHCP, TCP/IP, routing, switching and Knowledge of Azure and AWS Cloud Technologies.
