Company: SSA Recruitment

Location: Bloomsbury

Category: construction-and-extraction

### Intermediate Mechanical Design Engineer - London

SSA are currently recruiting for a leading M&E contractor who are looking for an intermediate level Mechanical Design Engineer to join their team to complete projects on High end luxury apartments . Their main role will require them to manage external Design consultants and CDP specialists while they complete the construction stage design delivery on high end residential projects in Central london.

The successful candidate will not be undertaking design tasks first-hand but their experience in mechanical engineering will be vital when validating designs of the specialists.

### Key Responsibilities:

Work with the appointed design consultancy to successfully deliver MEP designs to clients

Work with the design and commercial team to figure out design requirements

Work alongside BIM Engineers to maintain the required level of design to achieve the acceptance of the client

Provide engineering checks including production of checking calculations, details, drawings and schematics, to determine accuracy of design consultant work

Outset of new projects – agree deliverables list and programme with the Design consultant,the Preconstruction team and Planner

Attend regular Design team and procurement meetings to update on progress and determine tech sub requirements

Receive and review first issue of Design consultancy deliverables (drawings, calculations and tech subs) and return to Design consultancy as necessary, for revision The Ideal Candidate:

High rise housing and Stage 5 Design is essential (RIBA Stage 5 is a particular focus)

Relevant experience with a contractor proving high standards in MEP work

Experience in High rise residential work is vital

Excellent Communication Skills

Strong IT skills The successful candidate will receive a highly competitive salary with a great package
