

## IT Infrastructure Engineer – AWS/Terraform

[Apply Now](#)

Company: Intellect Group

Location: London Area

Category: other-general

IT Infrastructure Engineer – AWS/Terraform - London / Hybrid I am currently working with a leading software company based in central London looking for a talented cloud professional to join their team. Are you passionate about shaping the digital landscape and ensuring seamless operations in the realm of IT infrastructure? Key

**Responsibilities:** Design, deploy, and manage AWS cloud infrastructure to support our growing needs. Architect and maintain scalable, reliable, and secure server environments. Collaborate with cross-functional teams to ensure smooth integration of infrastructure components. Monitor system performance and troubleshoot issues to minimize downtime. Implement best practices for data security, backup, and disaster recovery. Stay updated with the latest industry trends and technologies to continuously optimize our infrastructure.

**Required Skills and Qualifications:** Proficiency in Amazon Web Services (AWS) including EC2, S3, RDS, IAM, and VPC. Strong experience in Terraform is highly desirable. Strong experience in Linux/Unix server administration and troubleshooting. Familiarity with containerization technologies such as Docker and Kubernetes. Solid understanding of networking concepts and protocols. Knowledge of scripting languages like Bash, Python, or PowerShell. Excellent problem-solving skills and attention to detail. Ability to work independently and in a team environment.

**Why Join Us:** Opportunity to work on cutting-edge technologies and projects that make a real impact. Collaborative and inclusive work culture that values innovation and diversity. Competitive compensation package with comprehensive benefits. Continuous learning and professional development opportunities. Work-life balance with flexible schedules and remote work options.
