IT Operations & Infrastructure Manager – Remote – £75-85k – ref: 1071

Infrastructure Operations Manager / IT Operations Manager / IT Operations Lead required to work for a Professional Services business based in Central London. However, due to Covid-19, this can be a remote role and be based pretty much anywhere in the UK.

We need a good, solid, experienced Ops Manager who has worked with Enterprise Businesses (or an Enterprise Business) in the past and can happily walk into a 6,000 user environment and simply get stuff done! This is about managing BAU and keeping the lights on, as well as looking forward and being prepared to get your teeth sunk into the up and coming Operations Transformation Programme.

We need someone with exposure to Azure, people management and solid experience of managing 3rd party vendors. This is probably 80% managing the vendors and keeping them on their toes, so that level of experience is 100% required!!! An understanding of DevOps would be a bonus.

This is a great opportunity and salary is dependent upon experience.
