

## Java Developer – London

[Apply Now](#)

Company: Oxford Knight

Location: London

Category: computer-and-mathematical

### Summary:

A leading quant trading hedge fund are looking for a Java developer to join their front office London team. Working alongside quant developers and researchers in London, the Java developer will be scaling out their trade execution platform in Java on AWS. The successful Java developer will have full ownership and will architect the platform, APIs and backend code to build fast, low latency distributed systems that can handle multiple TBs of data in real-time.

### Requirements :

BSc STEM field, preferably Computer Science

Experience programming in core Java

Experience writing multi-threaded code, building distributed systems and low-latency environments is beneficial

Experience in an agile, test-driven development

No financial product knowledge / experience needed

### Benefits :

Competitive salary and hedge fund-style bonus in London

Agile, technology and data-driven culture

Large investment in technology and low levels of red tape
